Warsaw, Poland

Artsiom Tsvirko

Profile

Dedicated full-stack software developer with 5+ years of experience in production development across diverse business domains including HealthCare, IoT, GameDev, FinTech, and E-Commerce. Proficient in Java, Kotlin, TypeScript, Python, and C/C++. Strong foundation in computer science and problem-solving skills cultivated through participation in IT Olympiads during high school and university.

Specializing in back-end development, with a keen interest in automation and DevOps practices. Enthusiastic about artificial intelligence, machine learning and blockchain.

Employment History

Senior Software Developer at Self Employed

06/2023–Present

- As a Senior Software Developer, I led the successful execution of multiple software development projects across diverse business domains, using my proficiency in a wide range of technology stacks.
- Designed and implemented high-performance, scalable back-end solutions that significantly enhanced system reliability and efficiency.
- Delivered robust software solutions by effectively collaborating with cross-functional teams to analyze and meet complex requirements.
- Continuously improved team performance and project outcomes by staying updated with the latest technologies and industry trends, incorporating best practices into development processes.
- Conducted code reviews and mentored junior developers to improve code quality and ensure adherence to best practices

Software Developer at Innwise Group

06/2019–08/2023

- Developed and maintained high-quality software applications using Java, Spring, and other technologies, resulting in improved system functionality and performance.
- Collaborated with a team of developers to design and implement innovative software solutions, contributing to successful project completions.
- Implemented automated monitoring and alerting to quickly identify and resolve system issues.

Junior Software Developer at EPAM Systems

01/2017–08/2019

- Actively contributed to software solution development utilizing Java, C++, JavaScript, Python, and other pertinent technologies.
- Demonstrated commitment to learning by acquiring certifications and introducing innovative ideas to enhance project outcomes.
- Engaged in rigorous code reviews and debugging processes to uphold software quality standards and optimize performance.

Education

Bachelor of Computer Science, Belarusian State University of Informatics and Radioelectronics
